Using biometric technology in construction

Today's Agenda

- Introduction to Causeway

- Biometrics in Everyday life

- The Causeway Donseed Ecosystem

- Biometric Identifiers and Software Overview

Lydia Brand-Williamson
Solution Sales Specialist

Lyds.brandwilliamson@causeway.com

We are Causeway

We are the largest specialist software provider to the UK construction market.

We offer an expanding set of cloud software solutions that span the entire construction life cycle from infrastructure design to cost-planning, bidding and tendering, through to build, trade and property maintenance.

9 of the top 10 UK contractors run on Causeway

8 of the top 10 UK house builders run on Causeway

7 of the top 10 UK surveyors run on Causeway

9 of the top 10 UK design consultants run on Causeway

170,000+ suppliers on the construction world's largest connected supply chain community

Biometric Technology

Biometrics in Everyday life

1 Mobile Payments

2 Online Banking

3 Immigration Services

4 eGov Processes

5 Workforce Management

More than 80% of UK owners of smartphones use their device's biometric verification.

The right people
In the right place
At the right time

Integration of biometrics in workforce management helps to eliminate time theft and increases ID accuracy and to boost operational efficiency

The Causeway Donseed Ecosystem

Our biometric labour management solution utilises industry-leading biometric identifiers to provide construction contractors with a truly digital solution to managing their on-site workforce, providing accurate time and attendance, qualification management and much more in one cloud platform.

Your Causeway Donseed

The Causeway Donseed Ecosystem

Within the Donseed ecosystem you can assign **identity tokens** by individual.

These identity tokens determine how individuals on your sites can sign-in.

The Donseed Ecosystem

Accurate identity of who is really on your sites (a legal requirement)

The capture of accurate T&A to pay your workforce

Access to real-time data to ensure H&S compliance

Manage site access to ensure only authorised personnel on site

Ability to quickly report across the supply chain and spot key trends

A centralised platform to manage training credentials

Powering Over 200 Construction Contractors

Groundwork Contractors	Fit Out Contractors	M&E Contractors	Housing Developers	Specialist Contractors

Biometric Identifiers

All-in-One Biometric Device

- A compact touchscreen device with an industry-leading FBI-certified fingerprint sensor and built-in contactless face capture technology.

- With no hard-wired IT installation required on site, the portable nature of the tablets make this device an ideal identification option for transient construction workforces.

- Tablet supplied in a rugged steel case which can be wall-mounted.

All-in-One Biometric Device (Facial Recognition)
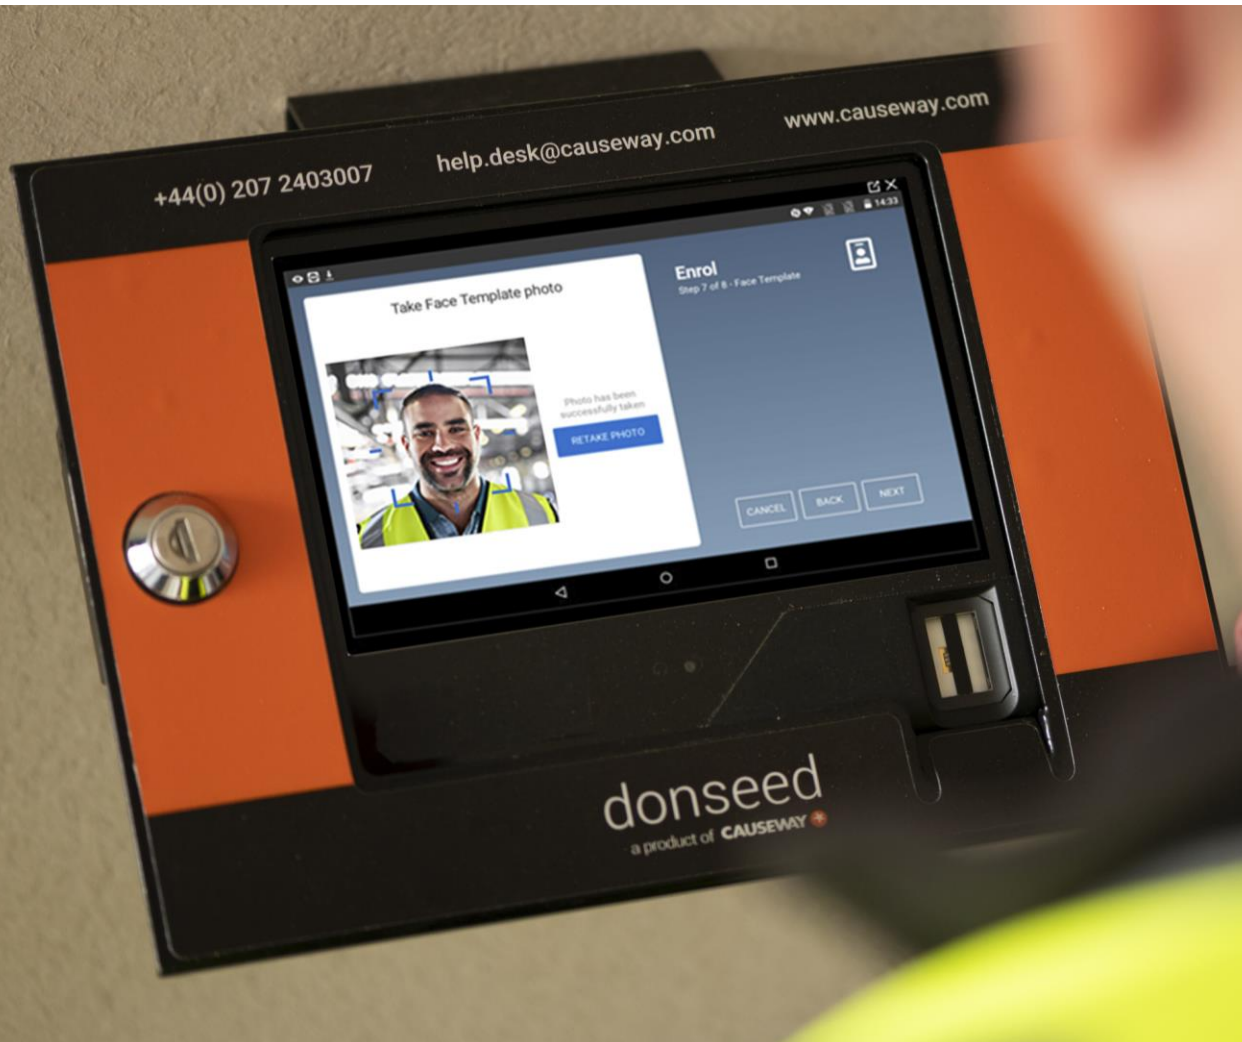

Facial recognition sign-in option:

- Built-in face capture technology

- 1:1 biometric match

- First: scan proximity card
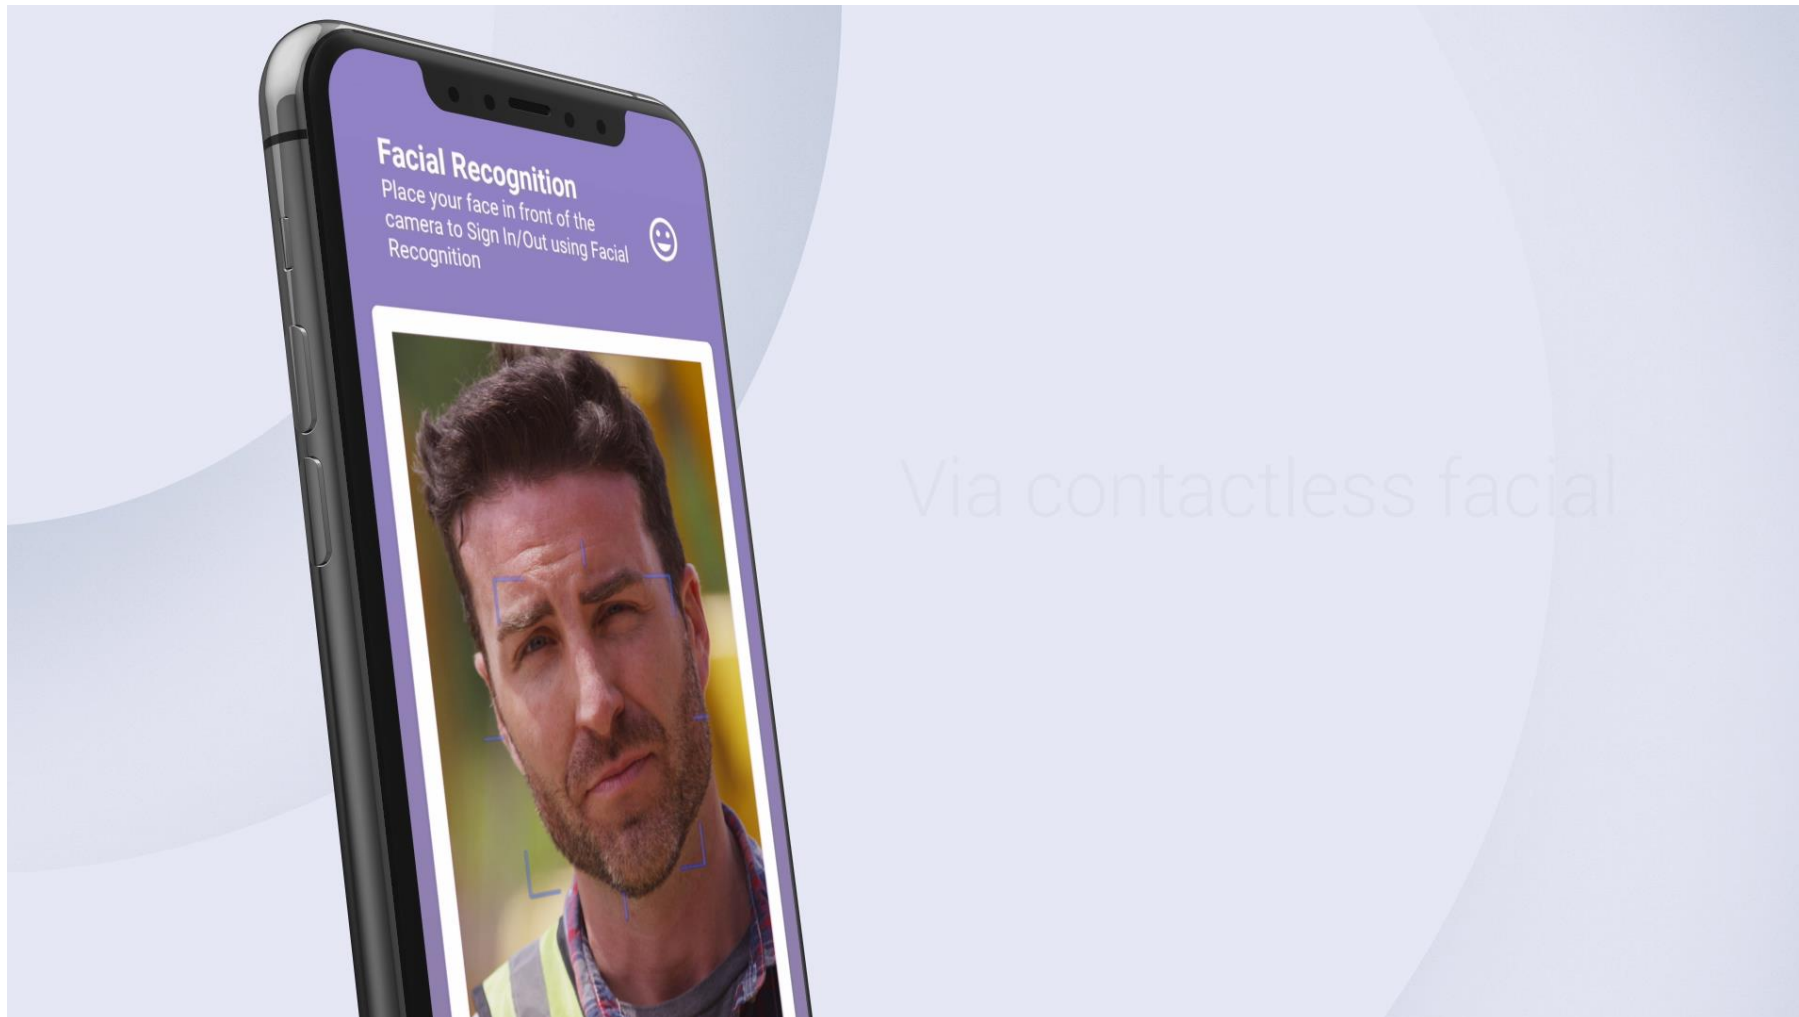

- Second: facial recognition verification

Mobile App (iOS and Android)

- Downloadable app available on iOS and Android mobile platforms.

- Built-in face capture, smartcard verification and GPS technology.
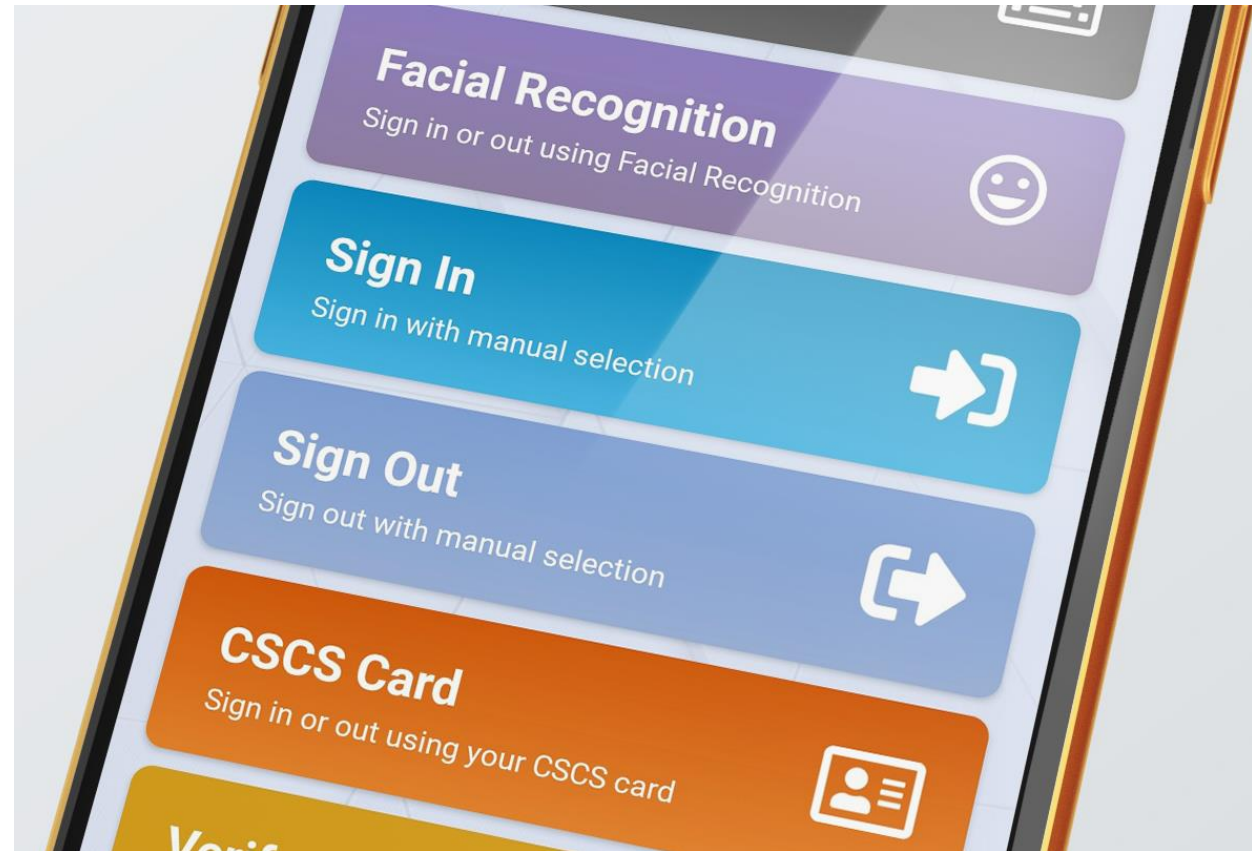

# Example Sign-In

Software Overview

Cloud-based software modules

- The portal is cloud-based, meaning that your data can be easily accessed via any device with internet access

- Time and attendance is at the core of the solution, but there are a whole host of modules available depending on your specific needs and objectives
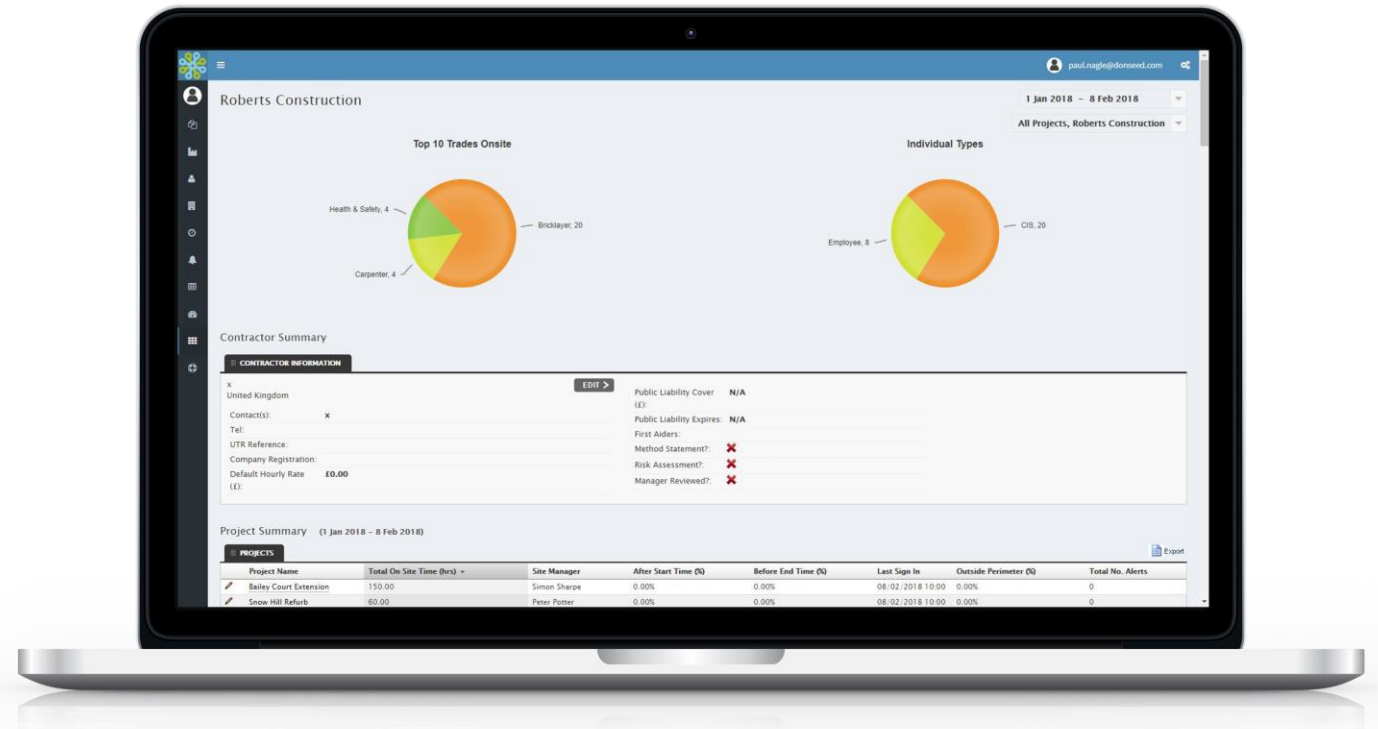

Powerful portal reporting outputs

- System reports can be set-up and scheduled for you and your team to receive on a regular basis e.g. weekly summaries

- Automated compliance alerts can be set-up to help you proactively manage your sites
